

# Understand the Main Idea

**Objective** Demonstrate comprehension of measurement and units of length.

## Learn the Main Idea

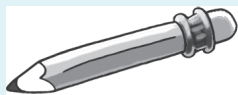

**MAIN IDEA** We use different units of length to measure how long something is.

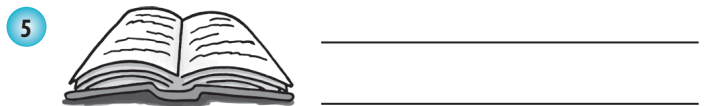

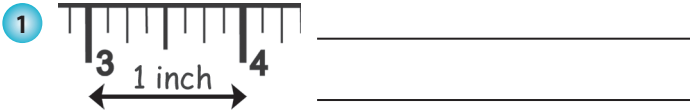

## Practice Applying the Main Idea

**Directions** Write *always the same size* or *not always the same size* next to each unit of length. The first one has been done for you. Write number 6 on a separate sheet of paper.

**Example**

not always the  
same size

6 Why is it usually better to measure with inches than with paper clips? Answer with a complete sentence on a separate sheet of paper.
